Tiesitkö, että ainoa paikka maailmassa, jossa on onnistuttu lisäämään Kauai saaren (Havaijin saaristo) kolme erittäin uhanalaista saniaislajia, on Tallinnan kasvitieteellinen puutarha?

Знаете ли вы, что Таллиннский ботанический сад — это единственное место в мире, где удалось размножить три находящиеся в крайней опасности вида папоротниковых с острова Кавай (Гавайский архипелаг)?

Kas teadsid, et ainus koht maailmas, kus on õnnestunud paljundada Kauai saare (Havai saarestik) kolme äärmiselt ohustatud sõnajala-liiki, on Tallinna Botaanikaaed?

*Asplenium dielmannii* Viane – just 50 more  
adult specimens remain in the wild.

*Asplenium diellaciniatum* Viane – the wild population has fewer than 100 specimens.

Tallinn Botanic Garden is located in the most beautiful area in Tallinn, at the edge of the primeval valley of the River Põlva and in the midst of a scenic pine forest.

There, you can enjoy one of the biggest plant collections in the Baltic States.

The Botanic Garden is a place to enjoy and discover silence and the mystery of nature.

Once a year, the Queen of the Night entrances visitors  
with its beauty.

The adornment and pride of the Botanic Garden, the Rose Garden,  
is celebrating its 50th anniversary this year.

50-year-old Rose Garden of Tallinn Botanic Garden

An orchid exhibition, the highlight of the year, is being highly awaited by both Estonians and their next-door neighbours.

Hi! It's a wonderful collection you have and  
how beautifully its cared for. Thank you for  
sharing your love with and artistic expression  
with us. Best and love Vanted -Hessan, Vignette

We have visited Botanical Gardens all  
over the world and your greenhouse  
displays are as good as any we have seen  
further afield!!
